

Banyule Significant Tree and Vegetation Assessments 2020

Banyule City Council is proud to acknowledge the Wurundjeri Woi-wurrung people as the traditional custodians of the land on which these significant trees are located. We pay our respect to all Aboriginal and Torres Strait Elders, past, present and emerging, who have resided in the area and have been an integral part of the region's history.

1. Introduction

Trees play a major contribution to the diversity and health of Banyule's landscape and environment.

There are 95 trees, or tree groups, in this assessment that have been selected for their special significance. They include a variety of native and exotic trees and other vegetation, which are of landscape, habitat, horticultural or genetic value, are rare or of localised distribution, are outstanding examples of their species or are of cultural or historical significance. The trees have been independently assessed by a qualified arborist to determine their significance.

As these trees and areas of vegetation play a special role in our neighbourhoods, it is important they are protected and considered in future development proposals. Significant trees and areas of vegetation are protected in the Banyule Planning Scheme by an Environmental Significance Overlay (ESO4). This assessment provides the basis for the recommended inclusion of an additional 95 trees or tree groups to the ESO4.

Each assessment includes:

- a code, which is the specific number for a given tree as identified in this assessment and in the ESO4
- details of each tree or tree group
- why the tree is significant

Table 1 outlines all the reasons for significance applied in these assessments. Table 2 lists the species and addresses of the 95 trees or tree groups.

Table 1: Criteria to identify significance

Reason for Significance	Criteria
<i>Landscape</i>	A tree or group of trees with outstanding aesthetic value or which frame or screen views, or act as a landmark.
<i>Size</i>	Any tree of outstanding size in height, girth or canopy spread.
<i>Age</i>	Any tree of an age that makes it old or venerable for its species variant.
<i>Botanical</i>	A tree which is rarely found in the wild or in cultivation.
<i>Horticultural</i>	Any tree which is of outstanding horticultural or genetic value, and which could be an important stock for future propagation.
<i>Historic</i>	Any tree with a specific historic or commemorative association.
<i>Form</i>	Any tree with an outstanding, unusual, abnormal or curious growth form.
<i>Remnant</i>	Trees which survive from the pre-European era.
<i>Habitat</i>	A tree or group of trees with outstanding value as habitat or niche for native flora and fauna.
<i>Aboriginal</i>	A tree which has associations with aboriginal culture or heritage.

Significance criteria based on the *City of Banyule, Significant Tree and Vegetation Study*, Centre for Urban Horticulture, University of Melbourne, March 2000
